

ViVOtech ViVOpay 4000

Contactless Card Reader

The Next Generation of
Payment Processing

Benefits at a Glance

- Speeds up check out time helping to increase efficiency
- Plug and play design ensure quick and easy installation
- Works with virtually all payment terminals

The ViVOpay 4000 can accept cards with an embedded chip as well as support payments made with chip-enabled radio frequency devices such as cell phones. To complete a payment transaction, the customer simply taps the reader with their contactless card or cell phone. A beep and a flash of light from the reader lets you know that the card's chip has been successfully read, allowing for quick transaction times and improved productivity. The unit's small footprint minimizes counter space. The ViVOpay 4000 supports contactless programs from Visa®, MasterCard®, Discover® Network and American Express®.

ViVOtech ViVOpay 4000

Simple & Easy to Use

- Plug-and-play design allows for quick installation
- Chip can be read within two inches of the device, allowing transactions to be completed through glass which is ideal for drive-thru windows
- A beep and a flash of light from the device let you know the chip has been successfully read
- Accepts all contactless credit cards and key fobs for Visa, MasterCard, American Express and Discover Network

A Simple Tap for
Fast Transaction Times
& Improved Productivity.
